### **WEATHER**

### **WEATHER SYNOPSIS BY REGION:**

#### NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

#### **Eureka Weather:**

An upper level system will bring a chance of thunderstorms over the mountains this afternoon and then again Tuesday afternoon. Temperatures will remain above normal while the coast will see low clouds and patchy drizzle each night and morning.

#### San Francisco Weather:

Look for cooling today and Tuesday as an upper level low passes over the forecast area. This will also lead to drizzle at the coast this morning and Monday night into Tuesday morning. A warming trend is then forecast from mid-week through Friday as high pressure begins to build over the eastern pacific.

## **CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY Sacramento Weather:**

A weak low pressure system will linger along the west coast through mid-week. The northern mountains and Mt Lassen area will see a chance of late afternoon and early evening thunderstorms today and Tuesday. Daytime highs will remain above normal.

#### **Hanford Weather:**

Breezy conditions and slightly cooler temperatures are expected through mid-week as a weak trough of low pressure will impact the region. A ridge of high pressure will then bring a warming trend to the area by late this week and continue into the weekend.

### **WEATHER SYNOPSIS BY REGION: (Cont.)**

#### **SOUTHERN CALIFORNIA:**

### Los Angeles Weather:

Overnight low clouds and fog along the coast onshore flow and a cooling trend is expected through midweek with the passage of a couple troughs. High pressure will return creating a warming trend Thursday through the weekend.

## Extreme Southwestern California Including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

A weak low pressure system near the west coast will maintain seasonal onshore flow with minor day to day variations through Friday with some inland warming possible next weekend. The marine layer will keep areas near the coast cooler with areas of night and morning coastal low clouds and fog extending into the western valleys at times. In the mountains and deserts there will be gusty west winds each late afternoon through late evening.

#### **Southeast California Weather:**

Aside from very thin/high cloud cover today skies should be mostly clear through at least Tuesday morning. Some late afternoon breeziness is expected today especially across southeast California but nothing much above 20-25kts. Otherwise winds will be light and will favor the typical diurnal patterns.

### SIGNIFICANT EVENTS / ACTIVITY

### **Northern California**

# <u>San Francisco Municipal Transportation Agency Mass Delays, San Francisco County</u> (New/Final)

San Francisco Municipal Transportation Agency (SF MTA) operators have called in sick en masse resulting in approximately two-thirds of MUNI vehicles being not in service leading to major delays to MUNI travelers. It is not anticipated that the "sick out" will continue tomorrow. There are currently no unmet needs by the County and no requests for State assistance. Cal OES Coastal Duty Officer continues to monitor the situation.

### **CAL OES ACTIVATIONS**

### Cal EOC Incident - 2014 Drought

- The SOC is activated at Level 2 in support of the Drought State of Emergency from 0800-1700 hours daily.
- The Inland REOC is activated at Level 2 from 0800-1700 Monday through Friday or as needed.
- The Southern REOC is activated at Level 1.
- The Santa Barbara County OA EOC is activated at Level 2 to be handled by the duty officer for the purpose of monitoring activities and gaining situational awareness. The operational period is 0800-1700 hours.

### Cal EOC Incident - 2014 Drought

### **Situational Summary**

On January 17, 2014 Governor Edmund G. Brown proclaimed a State of Emergency and directed state officials to take all necessary actions to prepare for drought conditions. The State Operation Center (SOC) is activated to implement objectives in support of the Governor's priorities. The lack of winter rain and snowfall has resulted in extremely dry conditions in many parts of the State. Reservoir levels are down significantly from where they should be on average for this time of year. If conditions continue without substantial rainfall, severe impacts to municipal water supplies, agriculture (plants and livestock) and firefighting capabilities are likely in store for the State over the next few months. Negative economic impacts will also result.

On April 25, 2014 Governor Brown released an Executive Order on Friday enabling several urgent actions to be taken as the drought persists into the state's traditional dry season.

\*\* As this rainy season comes to an end, it is highly unlikely that precipitation totals will increase significantly over the coming months. This winter's below average rain and snowfall worsens conditions in this third straight dry year.\*\*

### **Situational Summary (Cont.)**

- The Taskforce continues to meet regularly to take actions that conserve water and coordinate state response to the drought.
- The final manual snowpack survey of the season was conducted on Thursday (May 1) and showed California snowpack at 18% of normal. A more recent update using automated devices shows snowpack at 3% of normal as of May 30.
- DWR has announced that water essential for health and safety will be delivered through the state water project. The current State Water Project Allocation is 5%.
- Cal OES continues to gather drought-related costs from state agencies and local governments.
